

ROTEX® Drive Head Service Program

Smart Solutions for Your Drive Head Replacement or Repair Needs

www.rotex.com

Rotex® Drive Head Service

Rotex® Drive Heads are designed for long term, trouble-free service with minimal maintenance required. But in time, depending on operating hours and conditions, the drive head may require repair or replacement. To minimize costly downtime, ROTEX INC. offers a Drive Head Service Program to provide fast, reliable response to your drive head replacement or repair needs.

▲ Rotex reconditioned drives include a full 2-year warranty.

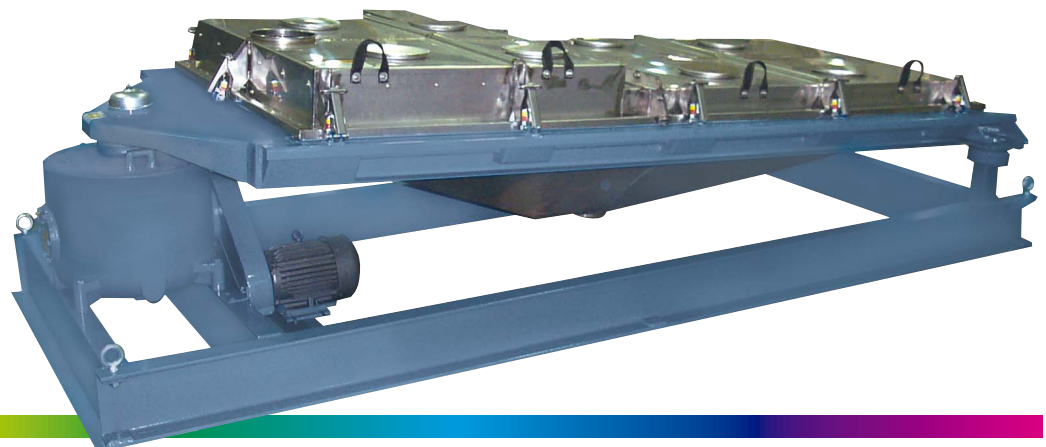

▲ Rotex uses only time-tested procedures and original factory quality components.

Service Options

Rotex offers three options to meet your drive head replacement or repair needs:

1. **Drive Exchange Service** – Rotex will ship you a reconditioned drive from stock. After installation of the reconditioned drive, you simply return your old drive to Rotex.
2. **Recondition Your Drive** – Rotex can rebuild and ship your drive within 3 days with a full **2-year warranty**.
3. **Purchase a Spare Drive** – Rotex keeps reconditioned drives in stock for any model ROTEX screener in your plant.

► For more information regarding ROTEX replacement parts, visit www.rotex.com

What this Program Means to You

1. In an emergency, provides immediate shipment of a stock drive head.
2. Eliminates short rebuild life and mechanical trouble due to "do-it-yourself" repairs or independent rebuilders who don't use genuine Rotex parts.
3. Minimizes costly production downtime.
4. Offers a full **2-year warranty**.
5. Gives you the piece of mind that your drives are being rebuilt by experienced Rotex factory personnel **using only genuine Rotex parts**.

Rely on the Experts

Every reconditioned ROTEX drive head operating under normal conditions carries the same **2-year warranty** as a new ROTEX drive head. This is possible because Rotex uses only time-tested procedures and original factory quality components. Every phase of this service is designed to provide the highest quality rebuilt drive head available, with unmatched turnaround times that minimize costly downtime.

How to Obtain Drive Head Service

1. Notify ROTEX INC. of your need for drive head service. We will issue a Return Goods Authorization (RGA) number and provide you with an immediate quote while on the phone.
2. Before shipment, drain the oil, clean the exterior and ship prepaid to Rotex Inc.

► Rotex keeps a full line of reconditioned drives in stock for immediate shipment.
